Subject: The Microsoft Settlement

In my reading of the information available on this case, I believe it would be a terrible injustice to our justice system and the ethics of our country if the Microsoft vs. DOJ case was settled in this currently proposed way. My reasons are simple:

1. For a company to be found as guilty as Microsoft has been found, based on the initial proposed sentence, and whose actions since have been nothing short of arrogant, it would make a mockery of DOJ to accept such a pathetically weak settlement.
2. More important, past history has shown this company will push the envelope of any reached settlement, it's expected it would continue to do so. The large number of anti-trust cases brought against this company cost tax dollars, not finding an ultimate solution is a bad investment, and it would not be long until we could find ourselves, as consumers and tax payers, footing the bill for a job left unfinished. More information can be found here: <http://www.kegel.com/remedy/>

I am not in the legal field, I'm in health care. I do not have a solution to offer other than saying the one we have now is not enough, not by far. Thank you for your time.
